SUMMARY

Full Stack Developer with 3+ years building and shipping production web applications in React.js, .NET/C#, and the MERN stack. Currently building enterprise systems for Toyota Kirloskar Motor at Technoforte Software — owning features end-to-end across secure authentication, role-based authorization, and API design. Track record of mentoring junior developers and delivering under production deadlines.

TECHNICAL SKILLS

Languages & Core: JavaScript, C#, HTML, CSS

Frontend: React.js, Next.js, Angular, Redux, Context API, Tailwind CSS, Material UI, Chakra UI, Bootstrap

Backend: .NET / C#, Node.js, Express.js

Database: SQL Server, MongoDB

Tools & Practices: REST API Design, JWT & OTP Authentication, Role-Based Authorization, Git, GitHub, GitLab, Swagger

WORK EXPERIENCE

Software Engineer — Technoforte Software Pvt. Ltd. *Mar 2025 – Present*

- Led an end-to-end application security revamp — redesigned authentication flows and implemented API authorization and access control used across the platform.
- Building enterprise manufacturing systems for Toyota Kirloskar Motor using React.js and .NET, including DriveIQ CRM (automotive lead & sales platform) and VDEM (vehicle quality gate system).
- Developed two new functional modules in a large-scale production system, collaborating closely with backend teams using C# and SQL Server.
- Built responsive UI screens and integrated REST APIs for car specifications, defect checks, and shift management.
- Led and trained 3–4 junior developers — reviewing code, assigning tasks, and ensuring on-time, quality delivery.

React Developer — Imenso Software Solutions Pvt. Ltd. *Jun 2023 – Mar 2025*

- Built and maintained full-stack web applications using React.js, Node.js, Express, and MongoDB for a USA-based healthcare client and an internal company-management product.
- Designed and integrated REST APIs, including OTP-based authentication, JWT, and role-based authorization for client and internal users.
- Optimized state management using Redux and Context API, improving application performance by ~30%.
- Developed Angular + PrimeNG modules covering CRUD workflows and PDF generation.
- Communicated directly with USA-based clients to gather requirements, clarify scope, and deliver feature updates.
- Mentored interns and collaborated cross-functionally to ensure timely, high-quality releases.

Full Stack Instructor (Part-time) — The Skillians *Jan 2025 – Present*

- Conducted 2 full-stack and 3 frontend batches covering HTML, CSS, JavaScript, React, Node.js, and MongoDB.
- Trained and mentored 250+ students (50–70 per batch) in frontend and backend development.

PROJECTS

DriveIQ CRM — Automotive CRM Platform — Toyota Kirloskar *Jul 2026 – Present*

React 19, Vite, Tailwind CSS, ASP.NET Core 8, SQL Server

- Built a full-stack CRM for Toyota Kirloskar for managing vehicle sales enquiries, leads, follow-ups, estimates, and service enquiries, with role-based routing and JWT authentication.

- Implemented automated Hot/Warm/Cold lead scheduling, Excel bulk enquiry upload, dashboards/reports, and background services for stock alerts and email notifications, following a Controller-Service-Repository architecture.

VDEM — Vehicle Quality Gate System — Toyota Kirloskar Motor *Jul 2025 – Present*

React.js, ASP.NET Core/C#, SQL Server, WebSockets

- Built an enterprise quality-management system for Toyota Kirloskar covering VIN/QR scanning, inspection checks, defect tracking, repair workflows, and Quality Hold processes.
- Implemented real-time features via WebSockets alongside REST API integration, authentication, and authorization.

Lavender — Healthcare Management Application — USA-based Healthcare Client *Jun 2023 – Mar 2025*

React.js, Redux, PDFMake, HTML2Canvas

- Built a healthcare app supporting rental booking management, custom availability charts, and order tracking across multiple user roles.
- Implemented PDF generation and document workflows using PDFMake and HTML2Canvas.

Ultron — Company Management System — Internal Product *Mar 2023 – Sep 2024*

MERN Stack, Microfrontend

- Built an internal company management system covering employee leave management, timesheets, project tracking, noticeboard, and ticketing.

EDUCATION

B.Sc. in Mathematics — Binod Bihari Mahto Koyalanchal University, Dhanbad *2017 – 2020*

Full Stack Web Development — Masai School (intensive bootcamp)
